

Total Maintenance Prevention (TMP)

Toshiba cleaning products are designed to safely and effectively remove dirt and dust build up, and contaminants such as ink and adhesive residue from the printhead, platen roller, paper paths, guides and the outer casing of the printer.

These products are manufactured using formulated cleaning solutions that will not cause abrasion damage to sensitive parts of the printer, nor will they discolour or erode the plastic or rubber parts they are designed to clean.

It is recognised that regular cleaning of the printer and its working parts can help reduce print quality issues and associated problems, avoiding costly engineer call outs and expensive downtime losses. TMP can also help prolong the life of the working parts and help reduce the number of spare parts that have to be replaced, such as printheads and platen rollers.

Keeping the working parts of the printer clean and free from contaminants will not only prolonging the life of the printhead but will help maintain the overall print quality whilst maximising the printers efficiency and output.

CL-IPA-Wipe

A cleaning wipe pre-saturated with Isopropyl Alcohol (IPA). Suitable for cleaning printheads, platens and paper paths of all thermal printers. 30 sachets per carton.

CL-GEN-Wipe

A pre-saturated general cleaning wipe. A specially formulated solution for cleaning plastic casing and rubber protections ends without causing corrosion or discolouration. Ideal for the B-SP2 handheld printer. 30 sachets per carton.

CL-PH-Swab

A 'snap' cleaning swab with foam tip, similar in appearance to a cotton bud, filled with IPA. Designed for cleaning printheads, platens and paper paths of all thermal printers. 5 swabs per pack.

CL-HC-Pen

A felt tip pen, similar in appearance to a dry marker pen, containing IPA. Suitable for cleaning printheads on all thermal printers. 12 pens per carton.

CL-HC-Card002

A pre-saturated cleaning card of absorbent, non-abrasive spun-bonded material. Designed for cleaning paper paths and printheads of thermal printers such as the B-SP2 and B-211. Other sizes available on request. 2" card, 25 cards per box.

CL-Magclean

Magswipe cleaning card. A pre-saturated card of absorbent, non-abrasive spun-bonded material. Designed for cleaning magnetic swipe card readers. 50 sachets per carton.

HEALTH & SAFETY

WARNING: PRODUCTS CONTAINING ISOPROPYL ALCOHOL (IPA) ARE FLAMMABLE.

Do not expose to heat or naked flame. Store in a cool, well-ventilated area free from sources of ignition. Do not ingest. Do not purposely breathe in vapour and avoid contact with the eyes. Dispose of safely in a manner not harmful to the environment.

HAZARD IDENTIFICATION:

Eye Contact:	Will cause irritation and redness. Wash out immediately with copious amounts of fresh water. If symptoms persist, seek medical attention.
Skin Contact:	Not a hazard in normal use.
Ingestion:	Do not swallow. Contains alcohol. Not a hazard in normal use but any ingestion may cause nausea. Seek medical attention.

FIRST AID MEASURES:

Skin Contact:	Wash hands after use.
Ingestion:	INGESTION: Drink copious amounts of fresh cold water and seek medical attention.
Inhalation:	Not a hazard in normal use. Move to fresh air area.
