

FS-1535

Electronic Cash Register

A Smart Terminal for Restaurants like Yours

Every Restaurant Needs One

Menu and table management are essential in the hospitality business. For this purpose the FS-1535 is equipped with a table tracking function that is easily tailored to meet the demands of all types of restaurants. Table linking, changing, or splitting is a piece of cake. Keep track of every item on your menu using the restaurant-specific features for PLU programming: different price and menu levels, condiment type PLUs, and much more to suit your needs. The versatile clerk accountability and complete invoicing functionality allow for strict control of the payment of individual orders.

Standard Interfaces for Scanning or PC Communication

Scanning functions are standard: source code and in-store code, price read key, and urgent PLU maintenance. You can configure the FS-1535 to communicate with a PC via the serial port: send programming data from the PC to the cash register, or retrieve the totals from the cash register to the PC.

FS-1535

Silent Thermal Printer

The FS-1535 is supplied with a fast thermal printer.

- 58 mm wide receipt / journal
